✏️ Work Experience

Front-End Developer - React - TypeScript

ZestMeUp, *Paris/Biarritz - June 2022 > Present*

I work on a team of 12 developers, using React and TypeScript to enhance our platform. I leverage AI effectively to automate routine tasks, allowing me to focus on solving more complex challenges.
I have experience managing application state with Redux and the Context API. Recently I've started taking on some smaller back-end tasks, and I've really enjoyed working on that side of development as well.

Full-Stack Developer

Kimok, Paris/Biarritz - January 2026 > Present

I developed a full-stack application from scratch, using React for the frontend and Node.js for the backend, with PostgreSQL as the database. I was responsible for the overall architecture, development, and integration of the different components.

UX-UI Designer

Freelance, *2017 > 2021*

UX & UI Design of websites, landing pages and apps for different clients. Mainly worked for a London based agency.

UX-UI Designer

Wise Digital, *Paris – 2015 > 2017*

Art direction and design for websites, landing pages, Youtube channel (Tag Heuer, La Poste, Taxis G7)

Web Designer

Mediatribu, *Paris – 2013 > 2015*

📚 Education

Titre professionnel RNCP Développeur Web

GRETA Sud-Aquitaine, Bayonne - 2020

Intensive 6 months training to learn the basics of web development.
After obtaining my degree, I continued to train for a year by building several small SaaS applications from scratch. I had my code reviewed by mentors, which helped me develop a strong sense of discipline.

Bachelor Art Direction

Ecole Multimédia, Paris - 2012-2013

BTS Communication visuelle

Efficom, Paris - 2009-2012

🔖 Others

Outside of code, I love surfing, climbing, discovering 90s movies, going to gigs, film photography and making music.
